Preface The Journal for Undergraduate Research in Bioengineering (JURIBE) has been a successful vehicle for undergraduates to publish their research results.

JURIBE features the broader scope of bioengineering research from the University of Washington Engineered Biomaterials Engineering Research Center, whose faculty and students collaborate on many research projects in biomaterials and tissue engineering. JURIBE offers an opportunity for students to publish their research. Undergraduates in bioengineering programs at other institutions are invited and encouraged to submit papers for publication in JURIBE. For publication information, please contact the Managing Editor or visit the Center's Web site.
