

2004 JURIBE
(JOURNAL OF UNDERGRADUATE RESEARCH IN BIOENGINEERING)
Volume 4, Number 1
Table of Contents

To request a reprint of the following articles, please contact Shari Ireton (info@uweb.engr.washington.edu or 206.616.9716). Limit one article or journal reprint per request. Please indicate the journal year, volume and number, as well as the page number, title and lead author name when requesting a reprint.

5 Instructions for Submission

7 A Professor's Life

Buddy D. Ratner, Director, UWEB

9 Investigation of Endothelial Cell Cathepsin Activity in Different Shear Stress Environments

Randy Ankeny, Manu O. Platt, Hanjoong Jo

13 Development of Sense/Anti-Sense SPARC Adenovirus for Modification of Implant Encapsulation

Merrill Birdno, Thomas Barker, E. Helene Sage

19 LPS Stimulation of Monocytes Causes Decreased Long Term Adhesion and Increased Cytokine Production

Spencer L. Bowen, Iris A. Garcia, Sandra Jelacic, Ronald V. Maier

25 Analysis Of Myogenic Proteins in the Development of a Myocardial Patch Using C2C12 Mouse Skeletal Myoblasts and Type-I Rat Tail Collagen

Ima M. Ebong, Kara E. McCloskey, Jan P. Stegemann, Robert M. Nerem

31 Mixed n-Isopropylacrylamide Self-assembled Monolayer: Characterization and Optimization of a Thermally Responsive Coating

Joseluis Espinosa, Heather Canavan, Xuanhong Cheng, David Castner, Buddy D. Ratner

37 Embryonic Stem Cell-Derived Endothelial Cells Form Vascular Structures in Collagen Gels

Meghan E. Gilroy, Kara E. McCloskey, Robert M. Nerem

42 A Novel Method of Encapsulating Biomaterials with Tissue

Stephen K. Gingrich, Stephanie J. Bryant, Buddy D. Ratner

49 Effect of Initial Fetal Calf Serum Concentration on Porcine Carotid Arteries in Static Organ Culture

Terrell A. Green, Brian H. Wayman, James N. Warnock, Raymond P. Vito

54 Magnetic Iron Oxide Nanoparticle Surface Modification for Cancer Therapeutics and Diagnostics

Divakar Gupta, Nathan Kohler, Miqin Zhang

58 Conjugation of Ovalbumin to a pH-responsive Polymer: A Model Protein-Based Vaccination Scheme

Genevieve Halpenny, Suzanne Flanary, Patrick Stayton, Allan Hoffman

63 Characterization of the Adhesion Properties of GT1-7 Neurons

Dana Kirkwood-Watts, Wendy Rockhill, Mark Ainsworth, Danielle Tilley

66 Bio-micromechanics of Dental Enamel: A Fracture Behavior Study by Indentation

Lois Lee, Hanson Fong, Mehmet Sarikaya

72 Thermoprecipitation and Separation of a Nucleic Acid Target using an Oligonucleotide-Smart Polymer Conjugate

Evan M. Leitz, Samarth Kulkarni, Patrick S. Stayton

76 Dose Response in Non-viral Gene Transfer Using DOTAP and Poly(propyl acrylic acid)

Jenna C. Lopez, Rachel E. Johns, Patrick S. Stayton

79 Inactivation of Matrix Gla Protein Enhances Calcification in Mouse Aortic Smooth Muscle Cells

Ryan J. Merrill, Mei Y. Speer, Cecilia M. Giachelli

83 Formation and AFM Characterization of a Silane Layer on Mica and Silicon Surfaces

Eiko Nishiuchi, James Hull, Heather Canavan, David Castner

90 Characterization of Covalently Immobilized Bovine Serum Albumin on Gold Patterned Silicon Substrates

Christopher Nojiri, Mandana Veisheh, Jayne Shelton, Miqin Zhang

98 The Role of Osteopontin in Foreign Body Giant Cell Reactions

Feyi Ogunyemi, Julie Rice, Cecilia M. Giachelli

103 Purification of Alkanethiols and the Effect on Monolayer Formation
Benjamin J. Roberts, Esmael Naeemi, Buddy D. Ratner

108 Regeneration and Seeded Scaffolds: Two Approaches to Tissue Engineering in Hand Trauma
Kyle Satterstrom, Jennifer James, Zudtky Wisecarver, Chris Allan

112 Effects of Micro- and Nano-size Hydroxyapatite on Chitosan-Alginate-Hydroxyapatite Macroporous Scaffolds
Enoch Shum, Hassna Remay, Miqin Zhang

118 Characterization of low-fouling plasma-polymerized tetraethylene glycol dimethylether films on polyurethanes and polydimethyl siloxane.
Ben Tomlinson, Lizzy Mayorga, Thomas Horbett

125 Preliminary Investigation of a Minimally-Invasive Retinal Prosthesis
C. Villalobos, Buddy D. Ratner, T.A. Reh, E.J. Seibel, P.S. Stayton

131 Vitamin D Metabolites Elicit a Sex-specific and Dose-dependent Response in Human Articular Chondrocytes and Regulate Protein Kinase C Activity
Carolyn Yeago, Ramsey Kinney, Zvi Schwartz, Barbara Boyan
