Assignment
Due June 30 or July 7

To practice for your final presentation, please prepare a 5 minute Powerpoint presentation on your summer research project. The presentation should include a title slide, background slides, and method slide(s). Three to four slides (plus title) should be sufficient for a 5 minute presentation. Please email your presentations to Jennifer Patterson at jp98@u.washington.edu by 9AM on the day of your presentation or bring your presentation to class on a ZIP disk, CD, or USB device. Put your last name in the title so that the presentations can be easily distinguished.

This exercise is designed to allow you to practice preparing slides and speaking in front of a group. However, it is not expected to be a full presentation with results and conclusions. It is OK to abruptly end after the method slide(s). It is also OK to have a rough transition between the introduction slides and the method slide(s). It will be useful to practice preparing and presenting two different types of slides.
